

**IN THE CLAIMS:**

Claim 1 (currently amended): Protective goggles comprising:

a frame body compositely formed with a rigid frame member and a resilient frame member;

at least one replaceable lens having an outer circumferential area, said replaceable lens being detachable with respect to a combination of the rigid and resilient frame members;  
and

wherein the outer circumferential area abuts against the resilient frame member and engages with the rigid frame member so as to be fixed together.

Claim 2 (original): The protective goggles according to claim 1, wherein the outer circumferential area of the lens is provided with a flange portion and a stopping portion.

Claim 3 (currently amended): The protective goggles according to claim 2, wherein the flange portion and the stopping portion are provided on at least a portion of a whole circumference of the lens.

Claim 4 (currently amended): The protective goggles according to claim 2, wherein the stopping ~~member~~ portion is engaged with the rigid frame member to be fixed together.

Claim 5 (original): The protective goggles according to claim 3, wherein the stopping member is engaged with the rigid frame member to be fixed together.

Claim 6 (original): The protective goggles according to claim 1, wherein the lens is extended to provide a tab portion thereto.

Claim 7 (original): The protective goggles according to claim 2, wherein the lens is extended to provide a tab portion thereto.

Claim 8 (original): The protective goggles according to claim 3, wherein the lens is extended to provide a tab portion thereto.

Claim 9 (original): The protective goggles according to claim 4, wherein the lens is extended to provide a tab portion thereto.

Claim 10 (original): The protective goggles according to claim 5, wherein the lens is extended to provide a tab portion thereto.

Claim 11 (original): The protective goggles according to claim 1, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 12 (original): The protective goggles according to claim 2, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 13 (original): The protective goggles according to claim 3, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 14 (original): The protective goggles according to claim 4, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 15 (original): The protective goggles according to claim 5, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 16 (original): The protective goggles according to claim 6, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 17 (original): The protective goggles according to claim 7, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 18 (original): The protective goggles according to claim 8, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 19 (original): The protective goggles according to claim 9, wherein a face-abutting cushion member is formed in one body with and by the resilient frame member.

Claim 20 (original): The protective goggles according to claim 10, wherein a face-abutting cushion member is formed in one body with the resilient frame member.

Claim 21 (original): The protective goggles according to claim 1, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 22 (original): The protective goggles according to claim 2, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 23 (original): The protective goggles according to claim 3, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 24 (original): The protective goggles according to claim 4, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 25 (original): The protective goggles according to claim 5, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 26 (original): The protective goggles according to claim 6, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 27 (original): The protective goggles according to claim 7, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 28 (original): The protective goggles according to claim 8, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 29 (original): The protective goggles according to claim 9, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 30 (original): The protective goggles according to claim 10, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 31 (original): The protective goggles according to claim 11, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 32 (original): The protective goggles according to claim 12, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 33 (original): The protective goggles according to claim 13, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 34 (original): The protective goggles according to claim 14, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 35 (original): The protective goggles according to claim 15, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 36 (original): The protective goggles according to claim 16, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 37 (original): The protective goggles according to claim 17, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 38 (original): The protective goggles according to claim 18, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 39 (original): The protective goggles according to claim 19, wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.

Claim 40 (original): The protective goggles according to claim 20 wherein a nose bridge member connecting a right side and a left side of the frame body together is formed in one body with and by the resilient frame member.
